

WASHING MACHINE MOTOR

Application: Induction Motor

Special design for industrial washing machines
2 washing cycles: 1000 rpm and 1250 rpm
Spinning cycle: 8900rpm
Ready for inverter application
No cooling fan is required
3 phase stator winding
Low noise due to optimized design for related frequencies
Aluminium Housing
Roller Bearing

Rated Voltage 230V AC 50 Hz
265V AC 60 Hz
Isolation Class F
Temp Rise B
Duty Cycle S9
Weight < 25 kg
Relative Humidity Max.95%
Ambient Temp. -15°C to +45°C

Performance measurements

rpm	P_out [kW]	Phase current [A]	T [Nm]	Eff [%]
980	715	3,3	6,95	71,0
1225	896	3,9	6,95	72,4
4750	1000	4,0	2,00	76,5
7100	1500	4,3	2,00	77,2
